

Sure Business Offshore Cloud Solutions

Exclusive partnership with HPE

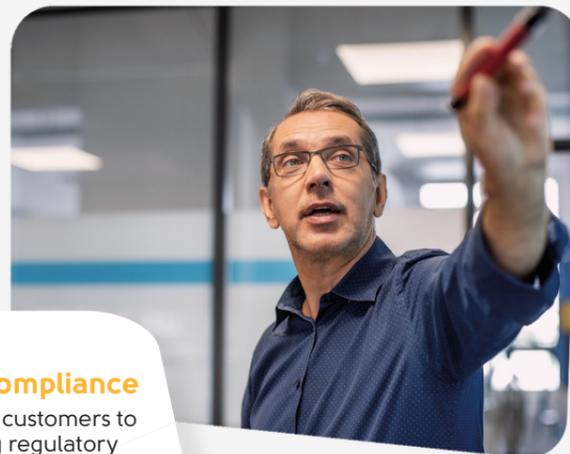

The Sure Cloud Solution helps businesses improve IT flexibility, reduce costs and enhance data security. Located in the Channel Islands it provides guaranteed data sovereignty, simplified regulatory compliance and is highly cost effective.

Benefits

1

Sovereign cloud

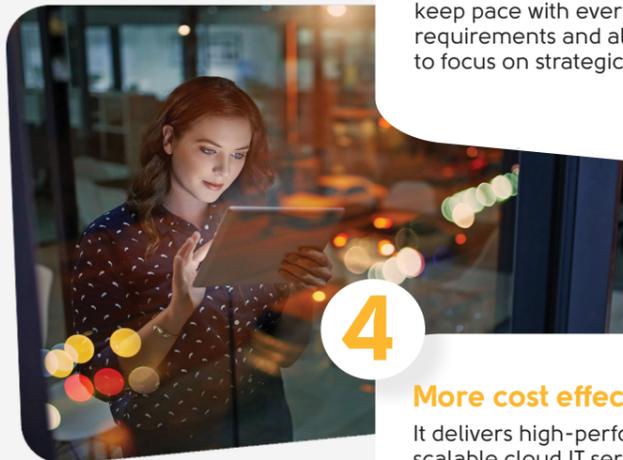

Provides a trusted environment for storing and processing data which remains under the jurisdiction of the Channel Islands.

2

Improved regulatory compliance

Migrating to Sure Cloud helps customers to keep pace with ever-changing regulatory requirements and allows in-house IT teams to focus on strategic priorities.

3

Improved sustainability

The platform is built on highly efficient and sustainably powered infrastructure. It allows customers to migrate from less-efficient legacy IT systems.

4

More cost effective

It delivers high-performance, highly scalable cloud IT services at a lower TCO than in-house solutions. It utilises sustainably sourced lower cost electricity and delivers excellent power efficiency.

5

Enhanced security & resilience

Improves information security because it is a purpose built, zero-trust, high-availability platform housed in owned offshore data centre facilities in Jersey and Guernsey. The dual-island design ensures exceptional resilience and data protection.

Customer Challenges

Over adoption of Public Cloud

How to protect ultra-sensitive client data

Shortage of on-island IT skills

Compliance with financial services regulations

Achieving ESG goals with in-house IT infrastructure

In-house IT security concerns

Why Sure Business Offshore Cloud?

- Delivered in exclusive partnership with Hewlett-Packard Enterprise.
- All the benefits of public cloud but with location certainty and the information security of a private cloud solution.
- Sensitive client data never leaves the Channel Islands and the infrastructure is supported locally by experts.
- All your IT services from an experienced local provider.
- The platform is fully compatible with Microsoft Azure HCI and all VMware based workloads.
- Highly accredited solution: ISO 27001 Information Security, ISO 22301 Business Continuity, PCI DSS V3.2.1 Data Centre Certification, Data Centres built to Tier 3 standards.
- Sure Cloud is more cost effective, resilient, secure and greener than in-house alternatives.
- Resides in highly efficient data centres and is sustainably powered by low emission nuclear sources.

About Sure Business

Sure provide an end-to-end IT service from network to cloud and application support. We have a proven track-record of delivering innovative cloud services to organisations that require the highest levels of information privacy. Our Offshore Cloud solutions are complemented by our Professional Services team. They build on the traditional Sure network foundations to deliver Managed Services across Cloud, Modern Workplace, Service Delivery and Service Support.
